

Excess Justification Report

For Excess Lot

FY15-051

Item #	Part #	Serial #	Description	Cond	Qty	Remarks
0001	289-276	DEA274408 (2552)	Scales, Precision Balance, Cond. 4	4	1	Scale is 19 years old and in good working condition. Operation manual included. Used with the Coulometric system for finding the amount of water in an oil sample.
0002	CA-06	DEA290229 (70E41726)	Coulometric Karl Fischer, Cond. 4	4	1	Determines amount of water in an oil sample. This coulometric is 18 years old and is in good working condition.
0003	FS II TEST KIT	DEA274297	Testing Fuel Sys/Icing, Cond. 4	4	1	This fuel system ice inhibitor test kit is 19 years old and is incomplete. Contains testing syringes and instruction manual for testing aviation fuel for proper amount of ice inhibitors.
0004	K16200	DEA274310 (R61091045)	Tester, Pensky Martin Flash, Cond. 4	4	1	For testing the flash point of fuel oils, this tester is 19 years old and is in good working condition.
0005	NMN RETRODE FILTER W/VACU	DEA244977	Automated Rotrode Filter Spectroscopy for Monitoring Mechanical Transmission Failure via Oil Analysis in Aviation, Cond. 4	4	1	Rotrode filter Spectroscopy system for the oil analysis of large wear particles. Includes vacuum pump with filters, tubing and test tubes. Also has a compact ultrasonic cleaner. Spectroscopy system is 21 years old and in good working condition.
0006	PT200061	DEA290326 (96701270013)	API Specific Gravity Tempering Bath, Cond. 4	4	1	For separating the contaminants from the oil by heating it up. This tempering system is 16 years old and is in good working condition. Includes spare parts.
